

A diagram of a cylinder with two horizontal elliptical bases. The top base has center point \$O\$ and contains points \$A\$ and \$B\$. The bottom base has center point \$O_1\$ and contains point \$D\$. A vertical dashed line segment connects \$A\$ to \$D\$, representing a generatrix. A solid line segment connects \$B\$ to \$D\$. A dashed line segment connects \$O\$ to \$O_1\$, representing the axis of the cylinder. Another dashed line segment connects \$O\$ to \$D\$. There is also a dashed line segment from \$O_1\$ to \$B\$. The text "РЕГУЛЯР.РФ" is visible at the bottom right of the diagram.
